APPLICATION

Typical fields of application for SLIMpatchcables:

- Overcrowded server or network cabinets or cable channels
- Switches with high port densities: with very short cables, it is easy to patch from switch to switch or switch to panel without a cable management panel
- Connection of terminal devices at the table (VoIP phones, Printer, PC, Notebook), as the cables are extremely flexible and therefore easy to lay on a desk
- Industrial applications where Ethernet connectivity is required but space is limited
- As a patch cord in the Notebook bag for Technicians and Field Staff
- In a private environment, to lay a patch cord under the carpet, the chair rail or even through a window seal
